

# BELGIUM WALLONIA

@ IBC 2023

Hall 10 Booth D31

International Broadcasting Convention

September 15 – 18, 2023

Amsterdam

  
Wallonia.be

Wallonia has an excellent logistics infrastructure and «multimodality» is the keyword. **Liege Airport** was awarded the title of **best cargo airport in the world** for the year 2020. You will also find yourself well supported : the actors of the sector are gathered in the «Logistics in Wallonia» cluster.

# WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

The Agence du Numérique is the public service body responsible for monitoring technological innovation and habits relating to digital technology, advising the Walloon Government and its departments on this area, and leading or coordinating operational or communication measures to support Wallonia's digital transformation by drawing on the Digital Wallonia strategy approved in December 2015.

What is Digital Wallonia?

A strategy. Adopted by the Walloon Government, it sets the priorities and goals for public policies and the support framework for private initiatives to promote the digital transformation.

A platform. Governed collaboratively by the Walloon digital ecosystem, it provides services and support to public and private players engaged in implementing the digital strategy.

A brand. Championed by all those involved in Wallonia's digital transformation, it guarantees their visibility and unites the initiatives implemented within the framework of the digital strategy.

TWIST (Technologies from Wallonia for Image, Sound and Text) is a business network of companies and a community platform that promotes innovation and growth in digital industries in southern Belgium, and mainly in digital sectors of Image and Sound.

In 12 years, TWIST has built a solid network of some 110 members (representing 4,500 direct jobs and a turnover of 1 billion euros), 80% of which are SMEs, 5 television channels, 6 universities & research centers. and 3 investment funds. TWIST is also supported by its public authorities and is an official partner of Digital Wallonia, the digital strategy adopted by the Government of Wallonia.

In this context, TWIST has developed a strong expertise in the "live sport & entertainment" industry (Sport & e-sport, Entertainment TV, Museum, Attractions/Theme parks, Live show, Live music, cinema).

Cyanview offers a universal camera control system based on an RCP and small hardware modules. CyanView's system addresses three elements of broadcast acquisition when using a mix of camera types: connection, control, and image quality. It drives a wide range of cameras, from ENG camcorders to mini-cams for specialty shots, or even D-Cinema cameras used on live art performances.

Cyanview is assigning them with system-cameras capabilities by controlling their shading, lenses or robotic heads. Dedicated to vision engineers, it also manages common video processors, routers and switchers on the control room side in order to easily integrate cameras with existing broadcast workflow. Being IP-based, the Cyanview system is ideal for any kind of production, enabling remote production scenarios worldwide.

We deliver solutions and expert services for integrating AI into operations, using computer vision and natural language processing, with a focus on rich descriptive metadata. We serve the media and entertainment industry, improving content production, post-production, automation, and management workflows. We provide end-to-end video analytics solutions: artificial intelligence, web front-end, database systems, integrations.

We are On-Hertz, pioneers in audio-first production software. Our mission is to amplify your production capabilities, enabling you to deliver outstanding live broadcasting anytime, anywhere, at any size. Our software is trusted by leading broadcasters to innovate their processes, reduce complexity, and increase efficiency.

With On-Hertz, you can future-proof and amplify your broadcast production to meet both creative and economic demands.

**Artisto**

At IBC 2023, On-Hertz further enhances its awarded audio-first production software, Artisto, with native support for SMPTE 2110-30/31.

This major add-on reinforces the position of Artisto as the solution of choice for IP-based workflows allowing for another massive leap in quality, flexibility and efficiency. More than ever, Artisto helps you future-proof and amplify your broadcast production.

TEVIOS provides premium broadcast and telecom solutions to audiovisual players across France, Belgium and Luxembourg. Our proposed technical solutions include monitoring and quality control of video and audio signals as well as live transport via IP and fiber optics. The TEVIOS "people-first" approach coupled with our expertise in the industry give our customers peace-of-mind to focus on their core business: audiovisual production.

TEVIOS is constantly adding unique broadcast and telecom solutions to our portfolio. The latest innovations include 4K broadcast monitoring and transport over fiber and IP in addition to a comprehensive suite of telemetry & analysis tools. All of these solutions are compatible with the latest broadcast standards (ST 2110/2022-7, 12G-SDI, AoIP...).
